

Possum Problems !

VV&VFACT has a Possum Trap available for use by Members, through Peter Kercher, if you have possums in your roof.

Possum entry points will need to be sealed off, then the trap will be placed in the roof space.

When the possum is caught it/they have to be released in the vicinity of the point of capture.

However, if you wish to host the possums outside your roof space, possum houses can be ordered at VV&VFACT.

Please contact the Office on telephone, 02 6255 1599 for additional information.
